

**Residential Neighborhood (RN)**

Residential Neighborhoods are an opportunity to develop a variety of housing options throughout the County. The higher density, mixed-use residential should be close to transit (VRE) or town centers. The middle transects can include both single-family attached and detached as well as multifamily units. In the lower transects, residential areas primarily accommodates single-family homes arranged in cluster or medium sized lots. In all transects, connections and pedestrian amenities should still be a priority for development design including trails and open space integrated into the development in appropriate locations. Affordable and work force housing is encouraged Countywide.
